

Project				OZON		
Date				23.07.2026		
Build				1.0		
Tester				Artyom Makarevich		
Environment				Windows 11 Version 25H2 Mozilla Firefox 153.0	Chrome	Edge
Module	Submodule	Element/ function	Summary	Status	Status	Status
Registration and log in	Registration via phone	Phone number input	Entering a phone number that is already registered > system immediately offers login flow (OTP) instead of registration error	passed	passed	passed
			Entering a phone number that is already registered > system does NOT show "already registered" error before sending OTP	passed	passed	passed
	OTP login flow	OTP code request	Request OTP for an existing number > code is sent, user can log	passed	passed	passed
			Request OTP for a non-existing number > system suggests registration	passed	passed	passed
		OTP validity	Enter incorrect OTP > error message, code remains valid for retry until expiration	passed	passed	passed
			Enter expired OTP > error message, option to resend	passed	passed	passed
		Concurrent sessions	Use the same valid OTP in two different browsers > one of the sessions gets blocked.	passed	passed	passed
		Cancellation	During OTP input, click "back" or "cancel" > return to phone number entry, no session created	passed	passed	passed
		Password fallback	After the one-time password (OTP) entry screen appears, the user can select the "Log in via email" option, which opens the email login method.	passed	passed	passed
		Same code reuse	After successful OTP login, try to use the same code again in another tab > code is invalidated	passed	passed	passed
	Account recovery	Phone number change	User with access to old phone changes linked number > verification via old number required	passed	passed	passed
		Lost phone	User cannot receive SMS on old number > system offers alternative recovery (e.g., email, recovery code, or support contact) - verify flow	skipped	skipped	skipped
	Session management	Logout from all devices	Click "logout from all devices" > active sessions on other browsers/apps are terminated within reasonable time	passed	passed	passed
		Cross-tab session	After login in one tab, open another tab > user remains authenticated (session shared)	passed	passed	passed
		Sensitive action	Changing linked phone number requires additional factor	passed	passed	passed
		VK ID	Clicking the button opens the provider's authorization window and returns the user to Ozon after a successful login.	passed	passed	passed

	Registration/log via VK ID, Apple, Госуслуги, email	Apple ID	Clicking the "Войти с Apple" button opens a separate window with the Apple sign-in form.	passed	passed	passed
		Госуслуги	Clicking the "Войти с Госуслуги" button opens a separate window with the Госуслуги sign-in form.	skipped	skipped	skipped
		Email	Log in using your existing email	passed	passed	passed
			Entering an email address with uppercase letters > successful login	passed	passed	passed
			Case-sensitive login > successful login	passed	passed	passed
			Ability to move to another line > error message	failed	failed	failed
			Login via unlinked email > error message	passed	passed	passed
			The text is cleared using the clear button.	failed	failed	failed
Catalog & search	Catalog	dropdown	Click the "Каталог" button > full list	passed	passed	passed
			the ability to open each category in the main window	failed	failed	failed
			ability to open a subcategory in the list	passed	passed	passed
			Click the "Весь Ozon" button > full list	passed	passed	passed
	Filtering and sorting	Filter	Filter by brand	passed	passed	passed
			Filter by category	passed	passed	passed
			Filter by rating	passed	passed	passed
			Filter by delivery speed	passed	passed	passed
			Filter by price	passed	passed	passed
			Filter by discount	passed	passed	passed
		sorting	Sort by Popular	passed	passed	passed
			Sort by Newest	passed	passed	passed
			Sort by Price: Low to High	passed	passed	passed
			Sort by Price: High to Low	passed	passed	passed
			Sort by Top Rated	passed	passed	passed
			Sort by Biggest Discounts	passed	passed	passed
		Input field	empty field > error	passed	passed	passed
			Search by name	passed	passed	passed
			Search by part number	passed	passed	passed
			Case-sensitive search	passed	passed	passed
			"Ничего не нашлось" message when there are no matches.	passed	passed	passed
			Search via suggestions/search history	passed	passed	passed
			Entering a name with leading and trailing spaces	passed	passed	passed
			The text is cleared using the clear button.	passed	passed	passed

	Search		Click the "Безде" button > category display	passed	passed	passed
			Selecting a category in "Безде" > category display in search results	passed	passed	passed
			Search within selected category > display category products	passed	passed	passed
		search by photo	Ability to search using an attached photo	passed	passed	passed
			URL search capability	passed	passed	passed
			empty field > error message	passed	passed	passed
			non-existent URL > error message	passed	passed	passed
			Empty field > error	passed	passed	passed
			Link not to an image > error	passed	passed	passed
Product Page	Product	information	Display of price, discount, seller information, delivery times and costs, and product availability.	passed	passed	passed
			Display variant selectors (size/color) where applicable, updating price/availability without full reload.	failed	failed	failed
			Display aggregated rating and customer reviews with photos/videos	passed	passed	passed
			"Add to Cart" and "Buy Now" actions available from product page	passed	passed	passed
			The seller's rating and a link to their storefront are displayed.	passed	passed	passed
			Change in delivery time upon change of location	passed	passed	passed
Cart & Checkout	Cart Persistence	Restore cart after login	Retaining items in the cart after logging out of the account or exiting the app	passed	passed	passed
		Merge guest card with user card	Guest and logged-in user carts are merged without losing items.	passed	passed	passed
	Cart Grouping	Group items from multiple sellers	Items from different sellers are grouped into several shipments.	passed	passed	passed
		Concurrent sessions	Verify cart synchronization when the cart is modified simultaneously across different devices or sessions.	passed	passed	passed
	Delivery Address	Select courier delivery address	At the checkout stage, select an address for courier delivery. Verify that the address is saved and the delivery cost is calculated correctly.	passed	passed	passed
		Select pickup point (PVZ)	The pickup point selection is confirmed, and the address is displayed.	passed	passed	passed
		Select parcel locker (postamat)	The option to select a parcel locker is available and displays correctly.	passed	passed	passed
			If the total falls below the minimum threshold, checkout is blocked or the customer is offered the option to pay extra for delivery.	passed	passed	passed
			For amounts above the threshold, delivery is free (or charged according to the terms).	passed	passed	passed

	Order	Min Order Value	Check whether information regarding the minimum order amount for free delivery is displayed at early stages (e. g., in the cart or when selecting an address), rather than only when checkout is blocked.	failed	failed	failed
			Verify the correct display of alternative paid delivery options if available for orders below the minimum amount.	passed	passed	passed
	Promo & Coins	Apply a valid promo code	A valid promo code correctly reduces the order total.	skipped	skipped	skipped
		Apply Ozon coins (bonus points)	At the checkout stage, apply Ozon Coins (bonus points). Verify that they are being deducted and the total amount is reduced.	skipped	skipped	skipped
	Checkout Flow	"Купить сейчас" (bypassing the cart)	"Купить сейчас" > proceed directly to checkout, item added to order	passed	passed	passed
		Proceed to checkout with empty cart	Empty cart > redirect to homepage/catalog with a message	passed	passed	passed
Payment	Payment Methods	Display all payment options	The checkout page displays all available payment methods: card, SBP, Ozon Card/Ozon Bank balance, installment plans/BNPL, and cash/card upon delivery (depending on availability).	passed	passed	passed
		Payment methods availability by region/delivery	Payment methods unavailable for the selected region or delivery method are either not displayed or appear as inactive.	passed	passed	passed
		Pay by bank card, SBP, Ozon Bank/ Ozon Card	The user can enter card details, complete 3D Secure verification (if required), and successfully pay for the order.	skipped	skipped	skipped
			Payment via SBP is successful.	skipped	skipped	skipped
			Payment from your Ozon Bank/Ozon Card balance was successful.	skipped	skipped	skipped
		Pay with cash/card on delivery; Postpay	For deferred payment, payment upon receipt at a pickup point is available.	skipped	skipped	skipped
	Payment result	Confirmation recovery	Check the ability to reopen confirmed order details after closing the payment page.	passed	passed	passed
		Failed payment status	Verify the correct order status following a failed payment and the absence of a confirmed order status.	passed	passed	passed
		Retry payment	Verify the ability to retry payment after a failed attempt without creating a duplicate order.	passed	passed	passed
		UI for multiple payment methods	On the payment page, you can select the amount for each payment method.	skipped	skipped	skipped
		Insufficient balance error	Debit amount exceeding balance > error message	passed	passed	passed
		Invalid combination (e.g., postpay + balance)	The system does not allow selecting an invalid method.	passed	passed	passed
		Display confirmation screen after success	After successful payment, a screen displaying the order number and expected delivery date appears.	passed	passed	passed

		Email receipt	An electronic receipt is sent to the email address specified in the profile.	passed	passed	passed
		Re-view confirmation from order history	In the "Мои заказы", opening the order details displays the order number, status, and delivery date.	passed	passed	passed
	Error Handling	Invalid card data	The payment is not going through, and an error message is displayed (e.g., invalid number, expiry date, or CVV).	passed	passed	passed
		Payment gateway timeout	In the event of a payment gateway timeout, the user receives an error message, and the order is not confirmed.	passed	passed	passed
		Order status after failed payment	If payment fails, the order does not transition to the "Подтвержден" status; the expected status is "Ошибка оплаты."	skipped	skipped	skipped
	Page Close / Disconnection	Close page immediately after successful payment	The order is considered confirmed; the order history shows the order number and status.	passed	passed	passed
		Connection lost immediately after successful payment	The order is confirmed; after the connection is restored, the user sees the correct status in the history.	skipped	skipped	skipped
Order Tracking & Delivery	Statuses	Status transitions	Verify the correctness of the order status transition sequence from processing to delivery/receipt.	passed	passed	passed
		Pickup expiration	Verify the display of an intermediate status/notification as the order storage period at the pickup point nears expiration.	passed	passed	passed
	Cancellation	Partial cancellation	Verify the recalculation of discounts/bonuses after the partial cancellation of items in an order.	skipped	skipped	skipped
		Minimum order after cancellation	Check the consequences of a partial cancellation if the remaining amount falls below the minimum delivery threshold.	skipped	skipped	skipped
	Delivery change	Change pickup point	Check the availability of changing the pickup point based on the current order status and logistics constraints.	passed	passed	passed
		Reschedule delivery	Check the availability of rescheduling delivery based on the delivery status and type.	passed	passed	passed
Returns & Claims	Returns	Return eligibility	Check the availability of return processing only for orders/items that meet current return conditions.	passed	passed	passed
		Reason selection	Verify that selecting a return reason is mandatory and correct.	passed	passed	passed
	Refund	Original payment unavailable	Verify the refund scenario if the original payment method is no longer available.	passed	passed	passed
		Alternative refund method	Check the offer of an alternative refund method if the original method is unavailable.	passed	passed	passed
		Missing item evidence	Check the rules for submitting evidence regarding a claim for missing goods.	passed	passed	passed
		Damaged item evidence	Check the rules for submitting evidence regarding a claim for damaged goods.	passed	passed	passed

	Claims	Incorrect item evidence	Check the rules for submitting evidence when receiving the wrong item.	passed	passed	passed
		Rejected claim	Verify the correct display of the result for an automatically rejected claim.	skipped	skipped	skipped
		Appeal	Check the availability and correctness of a re-appeal for a rejected claim, if a mechanism is provided	skipped	skipped	skipped
Account & Profile	Addresses	Active order address	Check the ability to modify or delete a saved address used by an active order.	passed	passed	passed
		Address data integrity	Verify that changing the address in the profile does not alter the address already set for an active order.	passed	passed	passed
	Payment methods	Saved payment method	Verify the addition, modification, and deletion of a saved payment method, taking active orders into account.	passed	passed	passed
	Personal data	Data validation	Verify validation of mandatory personal data when it is modified.	passed	passed	passed
	Notifications	Preferences	Verify independent control of available notification channels and the preservation of selected settings.	passed	passed	passed
	Personal messages	Clearing messages	"Отметить все прочитанным" button > messages are marked as read > notification indicator disappears from all icons without a restart.	failed	failed	failed
		Chat Add-ons	"Написать по заказу" button > select seller > chat with the seller opens	passed	passed	passed
		Chat management	Right-click the seller's email > Functions "Отключить уведомления", "Скрыть чат", "Пожаловаться", "Заблокировать" are available via the seller chat.	passed	passed	passed
Reviews & Ratings	Feedback Loop	Threaded Replies	Checking whether the buyer can comment on a public response from the seller or the platform (creating a dialogue or thread).	passed	passed	passed
	Moderation	Rejection Notifications	Verification that a notification specifying the exact reason (profanity, links, etc.) is sent to the user when a review is rejected by a moderator.	passed	passed	passed
Non-functional	Performance	Product page	Verify the loading of key product page content within the agreed Web Vitals (LCP/CLS) thresholds.	passed	passed	passed
		Search results	Verify the loading of key search result content within agreed-upon Web Vitals (LCP/CLS) thresholds.	passed	passed	passed
	Availability	Checkout	Verify checkout availability during failures or degradation of non-critical components.	passed	passed	passed
	Localization	Russian locale	Verify the correct display of key user scenarios in Russian.	passed	passed	passed
		Regional pricing	Check for changes in price or shipping cost when the user's region changes.	passed	passed	passed
		Regional delivery	Check for changes in available delivery methods and timeframes based on the region.	passed	passed	passed
	Accessibility	Keyboard navigation	Verify the accessibility of key scenarios without using a mouse.	passed	passed	passed
		Multi-device cart	Verify the consistency of the cart state when a user is working on multiple devices simultaneously.	passed	passed	passed

	Data integrity	Multi-device order	Verify the consistency of the order status and contents when the order is opened simultaneously on multiple devices.	passed	passed	passed
